

Posters and presentations

Poster session

The IUGB-2009 program includes stand reports (posters) according to the main congress themes.

The poster session will take place in the hall of Congress centre on the first floor at the registration area.

Possible formats:

- Stand poster (maximum dimensions 0,90 m x 1,2m)
- Slide show Microsoft Power Point (broadcast on the plasma screen)
- Video clip up to 5 min (broadcast on the plasma screen)

The stand reports will be installed right before the corresponding section meeting. The discussion of the stand reports is planned either at the end or during the break between section meetings. The authors should be at their posters during the discussion.

Multimedia reports presentation

Each congress conference hall is equipped with multimedia projector. The speakers are to submit the report presentation (Microsoft Power Point) before the meeting. We recommend the following media for multimedia presentations: CD-R disks or USB flashes.

Advisable rules for speakers

The speakers should stick to the international rules of giving a report – no more than 1 page per 3 minutes. According to it you should define the final duration of both the oral report presentation and multimedia presentation. (~15 minutes)
